Chapter 9: Withdrawing Your Capital Safely & Swiftly	Page 8
Chapter 10: Installing Native Mobile & Desktop Applications	Page 9
Chapter 11: Security Golden Rules & 24/7 Official Support	Page 9

SECURITY & RISK WARNING

Golden Security Principle: JuwishPro staff and administrators will NEVER ask you for your account password, Two-Factor Authentication (2FA) codes, or private recovery keys under any circumstances.

Chapter 1: Welcome to the JuwishPro Financial Ecosystem

Welcome to JuwishPro — an institutional-grade financial exchange designed to bridge decentralized digital assets with traditional global capital markets. Built with multi-layered encryption, sub-millisecond order matching, and unified multi-currency wallets, JuwishPro gives you complete control over your wealth.

Core Platform Pillars:

- **Multi-Asset Diversity:** Trade Cryptocurrencies, Futures Contracts with up to 100x leverage, Margin accounts, Forex currency pairs, and Equities (Stocks, ETFs, Bonds) in one place.
- **JuwishCoin (JWC) Native Token:** The heart of our ecosystem. Holding and staking JWC unlocks trading fee discounts, passive staking yields up to 18.5% APY, priority customer support, and governance voting.
- **High-Yield Automated Bots:** Commit capital to quantitative AI-driven trading strategies that generate daily passive percentage returns with guaranteed capital return upon maturity.
- **Native Cross-Platform Apps:** Access your portfolio seamlessly on Android, Windows PC, macOS, and iOS/iPad through high-performance native applications.

TRADER PRO TIP

Download Official Apps Only: Never download JuwishPro applications from unverified third-party websites. Always obtain authentic installation packages directly from **juwishcoin.online**.

Chapter 2: Account Registration, Onboarding & Security Hardening

2.1 Account Creation:

You can create an account in under 60 seconds through two secure methods:

- **Email Registration:** Enter your legal name, a valid email address, and a strong password (minimum 8 characters, combining uppercase, lowercase, numbers, and symbols).
- **Single-Click Social Authentication:** Sign up instantly using your authorized **Google**, **GitHub**, or **Twitter** account for streamlined access.

2.2 Email Verification & Activation OTP:

Upon submitting registration, a 6-digit One-Time Password (OTP) is dispatched from info@juwishcoin.online. Enter the code into the verification prompt to activate your account. If the email does not appear in your primary inbox, check your Spam or Promotions folder and whitelist info@juwishcoin.online.

2.3 Essential Security Hardening (Complete Immediately):

1. **Enable Two-Factor Authentication (2FA):** Navigate to Account > Security. Scan the QR code using Google Authenticator, Authy, or Microsoft Authenticator. Enter the 6-digit TOTP code to bind 2FA. This ensures no withdrawal or login can occur without your mobile device.
2. **Set an Anti-Phishing Security Code:** Define a custom phrase (e.g., 'Juwish2026'). Every legitimate email from JuwishPro will prominently include this phrase, proving the email is genuine and not an attacker spoof.
3. **Monitor Active Sessions:** Under Account > Security, review active login sessions. If you notice an unfamiliar device or IP address, click **'Logout Other Devices'** immediately to terminate all remote sessions.

Chapter 3: Identity Verification (KYC Step-by-Step)

Identity verification (KYC) protects your account against identity theft and ensures full compliance with international financial regulations. Verification unlocks high-volume deposits, high daily withdrawal limits, and margin trading.

Tier Level	Required Identification	Trading & Withdrawal Limits
Tier 1: Unverified	Email verified only	Deposits allowed; Spot trading allowed; Withdrawals: $0 / locked
Tier 2: Verified	Government Photo ID (Passport or National ID)	Full Crypto & Fiat Trading; Daily withdrawal up to $50,000
Tier 3: Institutional	Proof of Address + Selfie with ID	Unlimited Withdrawals; 100x Leverage Futures; Priority OTC

How to Submit Your Documents (/user/kyc):

1. Open the **KYC Verification** tab from the user sidebar.
2. Select your document type: **International Passport**, **National ID Card**, or **Driver's License**.
3. Upload a sharp, full-color photo of the document. Ensure all four corners are visible, text is crisp, and there is no camera glare.
4. Upload a recent **Proof of Address** (bank statement or utility bill dated within the last 90 days).
5. Click **Submit Verification**. Reviews are typically completed within 1 to 6 hours.

Chapter 4: Funding Your Wallet (Crypto, Fiat & Buying JuwishCoin)

JuwishPro supports multiple flexible deposit channels. Access the deposit terminal via **Deposits > New Deposit** (/user/deposits/new).

4.1 Cryptocurrency Deposit (BTC, ETH, USDT-TRC20, USDT-ERC20, SOL):

1. Select your target asset and network (e.g., USDT TRC-20 for fast, low-fee transfers).
2. Copy the displayed platform deposit address or scan the QR code with your external wallet app.
3. Send the exact amount from your external exchange (Binance, Coinbase, Kraken) or private wallet (TrustWallet, MetaMask).
4. Upload the transaction hash (TXID) or transfer screenshot and click **Confirm Deposit**.

4.2 Automated Instant Gateway (NOWPayments):

Choose **NOWPayments** for automated blockchain payment processing. The gateway presents an interactive checkout page. Once the blockchain achieves standard network confirmations (usually 1-3 confirmations), your wallet is credited automatically.

4.3 Buying JuwishCoin (JWC) Directly From Dashboard:

You can purchase JuwishCoin directly from your user dashboard (/user/deposits/buy-juwishcoin) as a seamless deposit method:

1. Navigate to **Deposits > Buy JuwishCoin**.
2. Enter the amount in USD you wish to invest (e.g., $500, $2,000, $10,000).
3. The live calculator shows your exact JuwishCoin allotment ($0.10 base price + any active bonus percentage).
4. Select payment source (Existing Account Balance or Direct Crypto Transfer) and confirm. Tokens are instantly credited to your wallet, immediately eligible for 18.5% APY staking!

Chapter 5: Managing Balances & Zero-Fee Internal Transfers

To safeguard your capital, JuwishPro separates holding balances from active trading margin. This structure ensures that leveraged trading risk cannot compromise your primary reserves.

Wallet Type	Primary Purpose	Transferability
Main Wallet Balance	Primary holding account; destination for all deposits and source for withdrawals.	Transferable to Trading Account at any time; 100% withdrawable.
Trading Account Balance	Collateral margin dedicated to Futures, Margin, and Forex positions.	Transferable back to Main Wallet whenever no margin is locked.
Bonus Balance	Promotional reward credits and deposit match allocations.	Usable as trading margin; profits earned from bonus are withdrawable.
Accrued Profits Ledger	Realized earnings disbursed from automated bot investments & staking.	Autocredited to Main Wallet daily; immediately withdrawable.

Executing an Instant Internal Transfer:

1. Navigate to **Trading > Account Overview** (/user/trading/account).
2. Under **Transfer Funds**, choose the source wallet (e.g., Main Wallet) and destination wallet (Trading Account).
3. Enter the amount to transfer and click **Transfer Now**.
4. Internal transfers are processed instantaneously with **0% fees** and zero blockchain wait times.

Chapter 6: Trading Terminal Mastery (Futures, Margin, Forex & Stocks)

The JuwishPro trading suite provides professional-grade tools including integrated TradingView charts, real-time WebSocket order books, and advanced order types.

6.1 Futures Trading (Perpetual Contracts with up to 100x Leverage):

Access the derivatives workstation at **Trading > Futures** (/user/trading/futures).

• **Leverage Slider:** Adjust leverage from 1x (no leverage) up to 100x. Higher leverage amplifies potential profits but narrows your liquidation distance.

• **Order Direction:**

- **Open Long (Buy):** Profit when the underlying asset price rises.

- **Open Short (Sell):** Profit when the underlying asset price drops.

• **Margin Modes:**

- **Isolated Margin:** Restricts risk solely to the margin allocated to that specific position.

- **Cross Margin:** Shares margin across all open positions to reduce liquidation likelihood.

• **Stop-Loss (SL) & Take-Profit (TP):** Always set mandatory SL and TP orders at the time of position entry to protect your balance automatically against sudden market spikes.

6.2 Forex Currency Trading:

Trade major pairs (EUR/USD, GBP/USD, USD/JPY) under **Trading > Forex** (/user/trading/forex/live). Beginners can switch to the **Forex Demo Account** to practice risk-free with virtual capital before executing live trades.

6.3 Capital Instruments (Equities, ETFs, Bonds):

Under **Capital Instruments** (/user/capital-instruments/stocks), diversify into traditional assets. Purchase shares in leading global equities, index funds (ETFs), and corporate bonds with instant settlement.

Chapter 7: Automated Investment Plans & JuwishCoin Staking

For hands-off investors, JuwishPro offers automated algorithmic trading strategies and token staking pools that deliver predictable, passive daily yields.

7.1 Automated Investment Plans (/user/investments/new):

1. Review available investment plans (e.g., Starter Tier, Professional Yield, Institutional Quant).
2. Compare terms: Minimum Deposit, Daily ROI (e.g., 1.5% - 3.5% daily), Duration (30 - 180 days), and Capital Return terms.
3. Allocate capital from your Main Wallet Balance.
4. Daily ROI is credited automatically to your account every 24 hours. Upon maturity, your initial principal is unlocked and returned according to the plan terms.

7.2 JuwishCoin (JWC) Staking Pools:

Lock your JuwishCoin in platform liquidity pools to earn compounding annual yields:

- **30-Day Flexible Staking:** 8.0% APY — ideal for short-term liquidity.
- **90-Day Standard Pool:** 12.0% APY — enhanced reward multiplier.
- **180-Day Growth Pool:** 15.0% APY — priority fee discount qualification.
- **365-Day VIP Staking:** 18.5% APY — maximum annual yield + VIP governance voting rights.

Chapter 8: Referral Program & Affiliate Commission Payouts

Monetize your network by sharing JuwishPro. Access your referral portal at **Referrals** (/user/referrals).

- **Your Referral Link & QR Code:** Copy your unique affiliate tracking URL or download your QR code graphic to share on social media, blogs, or trading groups.
- **Multi-Tier Commission Structure:** Earn passive commission percentages on both deposits and trading volume generated by users across your downline tiers (Tier 1: 7%, Tier 2: 3%, Tier 3: 1%).
- **Instant Payouts:** Referral commissions are calculated and credited automatically to your Main Wallet as soon as your referral's transaction completes.

Chapter 9: Withdrawing Your Capital Safely & Swiftly

Requesting withdrawals is straightforward and secure. Navigate to **Withdrawals > New Withdrawal** (/user/withdrawals/new).

Withdrawal Prerequisites:

1. Completed Tier 2 KYC verification.
2. Active Two-Factor Authentication (2FA).
3. Sufficient available balance in your **Main Wallet** (transfer funds from Trading Account if needed).

Step-by-Step Withdrawal Execution:

1. Select payout method: **Cryptocurrency** (USDT, BTC, ETH) or **Bank Wire**.
2. Paste your external destination wallet address. *Crucial: Double-check the network format (e.g., TRC-20 vs ERC-20). Sending to an incompatible network can cause irreversible loss.*
3. Enter the numerical withdrawal amount.
4. Enter your 6-digit 2FA authenticator code to confirm.

5. The system places the request in Pending status while automated compliance checks run. Crypto withdrawals are dispatched within 15 to 60 minutes; bank wire transfers settle in 1 to 3 business days.

Chapter 10: Installing Native Mobile & Desktop Applications

JuwishPro provides dedicated high-performance native applications across every major platform. Visit the official universal download hub at **juwishcoin.online** to download genuine packages.

Operating System	Package Format	Key Features & Hardware Acceleration
Android (Phone & Tablet)	JuwishPro-Client.apk	Native APK, Fingerprint & Biometric Login, real-time push alerts, offline caching
Windows PC	JuwishPro-Client.exe	.NET 8 + Microsoft Edge WebView2, multi-monitor charting layout, hardware acceleration
Apple macOS	JuwishPro-macOS-Client.zip	Universal binary (Apple Silicon M1/M2/M3/M4 & Intel), native WKWebView, Touch ID
Apple iOS / iPadOS	.IPA Sideload & PWA	Native .IPA sideloading or 1-Tap 'Add to Home Screen' PWA with Face ID and fullscreen

Platform-Specific Installation Steps:

- **Android:** Download JuwishPro-Client.apk. Tap the downloaded file. When prompted, toggle 'Allow installation from this source' in Android Settings. Tap **Install**.
- **Windows:** Download JuwishPro-Client.exe. Launch the installer. Follow on-screen prompts. If Windows SmartScreen appears, click 'More Info' and select 'Run Anyway'.
- **macOS:** Unzip JuwishPro-macOS-Client.zip. Drag **JuwishPro.app** to Applications. Right-click and select **Open** on first launch.
- **iOS / iPad:** Open Safari on your iPhone/iPad. Tap the **Share** icon (square with upward arrow) at the bottom toolbar. Scroll down and tap **'Add to Home Screen'**. Tap **Add**. JuwishPro will launch in native fullscreen mode with Face ID support!

Chapter 11: Security Golden Rules & 24/7 Official Support

Security is a shared responsibility between the platform and the trader. Adhere strictly to these golden principles:

1. **Verify Official Domains:** Always check the browser address bar. The ONLY official JuwishPro web properties are **juwishcoin.online** (Apps Hub) and **2026.dmillers.org** (Trading Portal). Never enter credentials on any other domain.
2. **Beware of Impersonators:** JuwishPro staff, administrators, and help desk agents will NEVER contact you privately on Telegram, WhatsApp, or Discord asking for funds, passwords, or recovery phrases.
3. **Check Anti-Phishing Codes:** Ensure that every email from JuwishPro displays your pre-configured Anti-Phishing security word in the email header.

Contacting Official 24/7 Customer Support:

- **Direct Official Mailbox:** Send support inquiries directly to **info@juwishcoin.online**.
- **In-App Live Chat:** Click the Live Chat widget at the bottom right corner of your user dashboard for real-time assistance from active engineering representatives.
- **Response Commitment:** Financial inquiries, deposit confirmations, and verification questions are processed 24 hours a day, 7 days a week.

TRADER PRO TIP

Start Trading with Confidence: With industry-leading liquidity, diverse multi-asset engines, and bank-grade cryptographic protection, JuwishPro is your gateway to financial independence. Happy Trading!
